

Science at Hunsdon School is engaging, inclusive, safe and provides opportunities for discovery.

Discovery

We provide stimulating lessons that give pupils ownership of their learning. We provide opportunities for pupils to formulate their own questions and theories. We provide access to resources that enable them to follow their curiosity, investigate their theories and discover for themselves.

Engaging

We understand that pupils are more effective learners when they are engaged in their learning. Staff show enthusiasm for the subject and provide opportunities for pupils to link science to real life.

Safe

We provide a safe environment where pupils feel comfortable to share their ideas and theories with their teachers and peers. We ensure that all activities have adequate resources that are safe and in good working order.

Inclusive

We plan lessons and experiences that are accessible and suitable for pupils of all abilities while still providing challenges.
